# The esg8022pset class\*

Jason Gross jgross@mit.edu

March 25, 2011

### 1 Introduction

The esg8022pset class provides a template for ESG class PSets.

It is set up so that there is one master file, which contains both problems and solutions. It might look something like

```
\documentclass{esg8022pset}
\begin{preamble}
\usepackage{amsmath}
\end{preamble}
\classname{\LaTeX}
\semester{Spring 2011}
\problemsetnumber{0}
\duedate{Today}
\psettitle{\LaTeX}
\begin{document}
\begin{problem}{Example Problem}
 Learn \LaTeX.
\end{problem}
\begin{solution}
 Read \emph{The Not So Short Introduction to \LaTeXe}
\end{solution}
\end{document}
```

If this file is called example.tex, then typesetting this file would create two new .tex files (a problems file called example\_Problems.tex, and a solutions file called example\_Solutions.tex), as well as a typeset version of the problems file. To get a typeset solutions file, you will need to typeset the example\_Solutions.tex

<sup>\*</sup>This document corresponds to esg8022pset?, dated?.

file. If you pass the option makesolutionspdf to this document class, and run latex with \write18 enabled, you will also get a pdf of the solutions file.

The default placement of figures is to be wherever you put them.

## 2 Usage

I give the usage and specification of every macro defined. I give bugs when I know them (please email me if you find other bugs, or have fixes for the bugs I list). I sometimes give extra description or justification.

\duedate

Usage:  $\forall duedate \{\langle date \rangle\}$ 

Specification: The  $\langle date \rangle$  is used as the due date.

\problemsetnumber

Usage:  $\problemsetnumber{\langle number \rangle}$ 

Specification: The  $\langle number \rangle$  is used as the problem set number.

\semester

Usage:  $\semester{\langle semester \rangle}$ 

Specification: The  $\langle semester \rangle$  is used as the semester of the class.

\classname

Usage:  $\cluster \class name \{\langle name \rangle\}\$ 

Specification: The  $\langle name \rangle$  is used as the name of the class.

\readingassignment

Usage:  $\rest$  \readingassignment{(assignment)}

Specification: The  $\langle assignment \rangle$  is used as the reading assignment. If it's empty, or if this command is not called, no reading assignment is shown.

\problemsettitle

Usage:  $\problemsettitle{\langle title \rangle}$ 

Specification: The  $\langle title \rangle$  is used as the problem set title.

problem

Usage:  $\begin{problem} begin{problem} begin{problem} begin{problem} [\langle number \rangle] {\langle description \rangle} \end{problem}$ 

Specification: The  $\langle number \rangle$  is used as the problem number, and defaults to the current section number (and is automatically incremented). The  $\langle description \rangle$  is used as the problem title/description. This command typesets a problem, which is written both the this file, the problems tex file, and the solutions tex file.

solution

Usage: \begin{solution}

Specification: Typesets the solution to a problem in the solution tex file.

ForProblems

Usage: \begin{ForProblems}

Specification: Inserts code into only the problem set file.

ForSolutions

Usage: \begin{ForSolutions}

Specification: Inserts code into only the solutions file.

ForPSet

Usage: \begin{ForPSet}

Specification: Inserts code into both the problems and solutions file.

## 3 Options

- ${\tt 1 \ \ less 8022 pset @ solutions} \\ {\tt less 8022 pset @ problems} \\ {\tt less 8022 pset @ p$
- 2 \newboolean{esg8022pset@pdfproblems}\newboolean{esg8022pset@pdfsolutions}
- 3 \DeclareOption{problems}{\setboolean{esg8022pset@problems}{true}\setboolean{esg8022pset@solutio

<sup>&</sup>lt;sup>1</sup>I am still trying to figure out how to get two pdfs (or dvis, etc.) out of a single .tex file. When I figure out how to do this, typesetting the solutions file separately will not be necessary.

```
5 \DeclareOption{makeproblemspdf}{\setboolean{esg8022pset@pdfproblems}{true}}
6 \DeclareOption{makesolutionspdf}{\setboolean{esg8022pset@pdfsolutions}{true}}
7 \DeclareOption{makeallpdfs}{\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg802pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setboolean{esg8022pset@pdfproblems}{true}\setbo
